INTRODUCTION
JTC Drum & Loop pedal is designed by guitar players and for guitar players who like jamming and improvising. Plug your guitar and start looping, JTC could detect your speed and quantize the loop to follow the drum automatically. You can record a loop up to 6 minutes and then start soloing or you can record melody layers as many as you want. It has a multi-functional footswitch, you can set tap tempo while only playing drum, holding footswitch to turn drum on/off, loop start/stop and you can undo/redo the last layer while playing loop.

Features
- Smallest 24 bits loop pedal with drum machine.
- 10 Drum patterns in different music styles and Metronome.
- Up to 6 minutes recording, unlimited layer.
- Smart Tap Tempo drum machine.
- Drum and Loop volumes can be adjusted separately.
- Hold the footswitch to use only drum function and control the speed with footswitch.
- True-bypass and analog dry-through.

Multi-Functional Footswitch
-Press once to Record/Play/Overdub Loop.
-While playing loop, press and hold to Undo/Redo the last layer.
-Double press to Stop, press and hold to Clear Loop.
-Without loop and hold for 1.5 sec to play drum only. When the drum is playing, you can hold for 1.5 seconds to stop the drum OR just press once to record loop.
-While drum is playing without loop, you could use SMART TAP TEMPO to control the speed.
  *Smart Tap Tempo: Press more than twice, if the time distance is less than 1.5 sec (40BPM), JTC interprets as Tap Tempo.
  *While playing loop, you could press DRUM ▶/II button to add drum machine, the drum will follow the loop speed automatically. (JTC already detected the loop speed.)

Press Once	Hold		Press Twice	Press & Hold
REC → PLAY → OVERDUB	PLAY → UNDO → REDO	PLAY →	STOP	CLEAR

More
Drum only
-Press DRUM ▶/II button to start drum machine without Loop, the initial speed is 100BPM. You could adjust the speed by Smart Tap Tempo.
-Press and hold the footswitch for 1.5 sec while no loop, you could start drum machine. You could adjust the speed by Smart Tap Tempo. Press and hold the footswitch for 1.5 sec again, you could stop drum machine.
